Discover the Personal Mandala

Traditionally, Mandala is an aid for focusing in meditation. We are using it from a personal point of perception: looking back – dreaming forward; allowing images to emerge from the Unconscious.

The word itself is Sanskrit, meaning 'the center and the circle.' The center is the convergence of time and space, the circle represents *the universe*, the container for your life: all of your experiences, dreams and aspirations. The Artist's Cottage is a safe and peaceful haven in which one can be quiet and introspective.

Creating a personal Mandala and receiving feedback based on the universal meaning of color, symbol, number and placement provides insight into one's deeper motivations. This may reveal purpose as well as a sense of direction, especially at times of transition and change.

Custom Blending in our Apothecary

Relying on your Unconscious to know your needs (physically, emotionally, mentally and spiritually), we assist you in creating your own, uniquely personal scent. Using healing essences we carefully calibrate for perfection and beauty.

Once you have completed your fragrance selection, your personal record will be stored. This will allow you to establish your own personalized line of products for future requirements.
